CURRENT ACADEMIC APPOINTMENTS

Research Associate, University of Heidelberg
Alfred-Weber-Institute of Economics
Chair of International and Development Politics

September 2015 to present

Research Associate, University of Göttingen
Chair of Development Economics

April 2021 to present

PERSONAL INFORMATION

married, one child (maternity leave: January – October 2020)

RESEARCH INTERESTS

**Development Economics, Environmental Economics, Political Economy,
Applied Econometrics**

EDUCATION

University of Heidelberg, Germany

Ph.D. Candidate, Economics, since January 2016

- Thesis: *Financing for Sustainable Development - Emerging Issues and Actors*
- Adviser: Professor Axel Dreher
- Prospective date of defense: February 2022

University of California Berkeley, United States

Visiting Student Researcher, March - May 2019

- Invited by Professor Edward Miguel

University of Mannheim, Germany

Ph.D. courses in Economics, 2015-2016

London School of Economics and Political Science, United Kingdom

M. Sc., Environment and Development, 2011-2012

University of Bayreuth, Germany

B.A., Philosophy and Economics, 2007-2011

Indian Institute of Planning and Management, New Delhi, India

Visiting Student, August 2009-March 2010

RESEARCH PAPERS [1] **Move on up - Electrification and Internal Migration** (Job Market Paper)

Abstract: This study uses the large scale roll-out of electric transmission infrastructure in Nigeria from 2009 to 2015 to quantify the effect of electrification on internal migration. I address endogenous location of electricity infrastructure by estimating effects on peripheral households not directly targeted by the policy in combination with instrumenting for the actual grid path by a hypothetical least cost grid. Results show an increase in individual migration propensity by 6 percent and a reduction of household size by 0.8 individuals, mainly driven by young adults and older teenagers. This result can be explained by an increased access to credit due with a coinciding lack of employment generation for the younger sub-population. Results from a gravity model of migration show a reduction in the elasticity of migration with respect to movement costs and a rise in migration to rural, electrified destinations following the electricity supply shock.

- [2] **Democracy and Aid Donorship** (with Andreas Fuchs), *American Economic Journal: Economic Policy*, 13(4): 217-238, November 2021

Abstract: Almost half of the world's states provide bilateral development assistance. While previous research takes the set of donor countries as exogenous, this article introduces a new dataset on aid giving covering all countries in the world, both rich and poor, and explores the determinants of aid donorship. It argues and shows empirically that democratic institutions support the setup of an aid program in richer countries but undermine its establishment in poorer countries. The findings hold in instrumental-variable regressions and the pattern is similar for the amount of aid.

- [3] **Broken Promises - Evaluating an Incomplete Cash Transfer Program** (with Utz Pape and Laura Ralston) *World Bank Policy Research Working Papers*, No. 141859, September 2019

Abstract: This study uses an unconditional cash grant program in South Sudan that had to be terminated due to conflict to assess the socio-economic, behavioral and psychological consequences of operational problems in development programs. We combine survey data from face-to-face interviews and data from lab experiments to study the unintended impacts of the program cancellation. Results from LATE estimations show that those participants that failed to receive the grant display a reduction in their consumption level and their trust level. Women of this subgroup also display an increase in their risk aversion. We learn about the original program design that participants that received the grants as intended increased their consumption and savings, while business skills improved only for men.
